## **Eraneos Switzerland intensifies portfolio for financial services industry, bolsters partner team with Adrian Glatz and Robert Schelling**

**Zurich, 25 August 2023 – Eraneos Switzerland AG is expanding its expertise within the financial services industry. The international digital transformation consultancy has successfully recruited leading enterprise transformation professionals, Adrian Glatz and Robert Schelling. Their addition to the Eraneos partner team marks a significant milestone in the company's commitment to delivering cutting-edge knowledge-based services to clients in Switzerland and internationally.**

Adrian Wägli, Managing Partner at Eraneos Switzerland, asserts, “I am very pleased to welcome Adrian Glatz and Robert Schelling to our partner team. It is proof of our abiding commitment and continuing development within the financial services industry. Our clients can expect to benefit from a new level of consulting service, encompassing the full spectrum of their transformation needs, from integrated solution strategies to technology implementation.”

Adrian Glatz joins Eraneos to spearhead the consultancy's strategic approach to the financial services industry. A highly experienced leader in the international financial services sector, he will navigate Eraneos' targeted expansion into international organizations, in addition to local industry. Known for helping firms to drive change smoothly from ideation to go-live, his expertise in leading digital transformation journeys, platform business design, and technology adaptations from start to finish enhances Eraneos' consultancy services portfolio and increases their capabilities for creating a robust client impact.

Robert Schelling is set to extend Eraneos' portfolio of best-practice management consulting capabilities and enhance the integrated approach to the financial services market on behalf of universal and private banks with international impact. Robert has been instrumental in helping financial service institutions in mastering their transformation complexities and challenges. He has a stellar reputation for deep
